

Assignment 5

Module 3: UI & UX

Due Date: Dec 13th, 2022

The goal of this assignment is to familiarize yourself with ReactJS. You will have to design frontend interface for a simple contact Book. The contact book should allow user to do the following:

1. Login & registration (Provide appropriate security features)
2. Showing Contact list in Webgrid by default all the contract and they can search by different criteria's
3. Add new Contact
4. Edit Existing Contact only they are created
5. Delete Existing Contact only they are created
6. Export Contact list to Excel File

NOTE:

1. While you may choose any technology for backend and database, the frontend has to be in ReactJS.
2. All submissions (source code) to be made to your onedrive folder. Please do not email the assignments.
3. You can host your weblink anywhere you want. But ensure that it is working Between Dec 13th and Dec 19th as that is when I plan to grade your assignment.
